Letter of Recommendation

It is with great pleasure that I recommend **Mr. Darsh Mashru**, a student pursuing a Bachelor of Technology in Computer Engineering at our institution. He has demonstrated a deep passion for technology through his active involvement in our student chapters. He was the Vice Chairperson of NMIMS' official technology festival, Taqneeq, and through his role in MumbaiMUN, he has shown a proactive approach to applying theoretical knowledge to real-world challenges, making him a standout in both academic and technical capacities.

Darsh applied his technical skills to solve the challenge of managing large-scale delegate operations at MumbaiMUN by developing the Delego app. The app streamlined communication, schedule management, and document submissions for over 650 delegates. The app still continues to be used today. Additionally, his contributions to Taqneeq included building key digital infrastructure, such as websites and apps, that significantly enhanced operations.

Darsh is currently interning at the **National Centre for Aerospace Innovation and Research at Indian Institute of Technology (IIT) Bombay** as an AI/ML Research Intern. His previous internships at ReWork AI and MindTech helped him cultivate a good foundation by providing him with a diverse range of experiences. Additionally, Darsh has published two blogs in **Google Cloud's official Medium publication**, demonstrating not only his technical expertise but also his inclination to share knowledge with others. This reflects his initiative and a strong habit of fully committing to and delivering projects in a holistic manner, from execution to knowledge dissemination.

Given Darsh's commendable academic disposition, technical skills, and demonstrated leadership, he would be an asset to any future employer. His ability to bridge theoretical concepts with practical applications, as evidenced by successful internships and project work, positions him as a well-rounded candidate ready to excel in a professional environment.

I wish him all the best in his future endeavours.

Sincerely,

Dr Koteswararao Anne
Dean
